

2022/2023 Semester 2

4062/3010 Computer Security

Week 9 Tutorial Discussions

1. Why do company find it so hard to thwart phishing attacks?
2. What are some **effective** methods to reduce almost to zero the number of phishing incidents in companies?
3. Supposedly you are the CISO (chief info security officer) of a big company and you are about to launch a new e-commerce website. What do you think are your best ways to ensure your company website is ready to face the public?
